About me

I was born on May 23, 2004. I am currently a high school student. I have been interested in programming from childhood. I started my journey by attending game jams, creating games using the Unity engine. However, my greatest passion is creating mobile applications for iOS.

Experience

iOS developer - 2020 - teraz

TarBUS, Tarnów

Tarbus is the most popular, most frequently and best rated Tarnów application on the AppStore. As one of the founders of the startup, I am fully responsible for the iOS application. It is the result of cooperation with the Michalus transport company, the schedule of which is available in the application.

iOS and web developer - 2021

Mebloart - Email footers, Tarnów

A small project that uses a wide spectrum of my skills. Starting from designing footers in HTML and CSS, ending with creating an iPad application for generating footers using SwiftUI. The application allows you to create footers from the editor level or by importing CSV files.

Achievements and prizes

Winner of the WWDC21 Swift Student Challenge organized annually by Apple Inc.
